NOTICE

1. This draft PWS mandates the use of the Defense Working Capital Accounting System (DWAS) by the Service Provider. However, the Government is interested in obtaining industry's input on alternative systems that meet or exceed the required functionality of the Government-provided accounting system.
2. Based on the long-term relationship that DAPS has established with its customers and concern expressed by these customers regarding the potential loss of on-site support they currently have, the Government would like input from industry defining various levels of on-site support that would ensure that these requirements are met in the most responsive, effective and economical manner.
